The Nugget Is California's Leading Mining Weekly

Nevada City Nugget

VOLUME V, NUMBER 24 THE GOLD CENTER NEVADA CITY, NEVADA COUNTY, CALIFORNIA THE COUNTY SEAT PAPER FRIDAY, MAY 15, 1931

LEGISLATIVE GOSSIP AT STATE CAPITAL

BY BERT CASSIDY

A furore such as has been stirred in political circles in the State of California is being kicked up by the newspapers against Senate Bill 630, introduced by the writer for the Mining Association to make possible the carrying out of Governor Rolph's pre-election promise to do something to rohabiliate mining in California. The papers naturally bring out the points they desire to have expressed, but unfortunately for the people, the true picture is not given to them. The bill has as its purpose, the rehabilitation of mining in California. Mining is a gamble. The public knows that to begin with, and as a result they make an investment in mining stock, they take years to mulct the public out of a sum of money as a great as that stolen by Bessemeyer in the Building and Loan scandal of recent occurance, or the Julian scandal, operated under the present "Blue Sky" laws. Every piece of legislation that has been placed on the statuate booken in recent years, has been restrictive and hampering th rights of the mall operators. In this time of depression, it is just and right that restriction should be lifted in so far as it is good public policy to do so, we believe that this particular measure is in keeping with good public policy at this time. It does not permit the dealing in "Fake" mining stock as one paper said, It will permit the prospector to go back into the hills and take his chance at making his "stake" if he makes a find.

An extra session of the legislature hes been made a vertual certainty by a statement in the press today. Gov. Rolph has said he will call a special sesion in the fall to consider this important problem. This will give the representatives time to go home and make a study of local conditions. After a few months respite from the present labors, a special sesion will undoubtedly throw much ligha on the whole subject, which is of such vital interest to the mountains.

The so-called spoils bills have been had all the teeth taken out of them in the Assembly and when they come up for consideration in the Senate will probobly be irioned out a little more.

The Sewell Trespass Bill will be up for consideration in the Senote Thursday or Friday. A very noticeable concerted effort is being made to defeat the measures in the Senate and this will be done either through amendment or by a direct vote against the bill itself. One of the largest newspapers are sponsoring the bill but it hits directly at a matter in which all of the people are interested and as a result, Sonsiderable opposition is developing. The writer is personally leading a group of opposition on the Senate floor.

With the Senate's general fund balance $28,000,000 virtually out to $12,000,000 by special appropriation, it looks as if a special ad valorem tax will face the people of California, unless new methods of taxation are devised. The tax problem which is one of the most controversial at all times, and always will be, has had little recognition at this session of the legislature. It has consistently been side-tracked by the legislature and no program has been announced for the future. It is high time the matter was getting a little personal attention.

MARIPOSA TO STAGE '49 CELEBRATION

Mariposa County is planning to stage one of the largest Forty-Nine celebrations held in California, with Governor Rolph on hand as the sponsor. The celebration is under the auspices of the Mariposa Chapter of Mining Association. Rock drilling contests, gold panning contests, and all the local color of gambling dens, dance halls, parades, etc.

The secretary of Nevada County County Mining Association received a communication from Richard Buhlis ,Secretary f Maripsa Chapter asking that a baseball team be sent to play the Mariposa team. The local boys are very enthusiastic over the prospect of the trip through the Mother Lode counties and hope to bring home the bacon.

DAHL NIVINS PASSED AWAY MONDAY MORNING

Lacking just a few days of having reached the three quarter centuary mark Dahl Nivins passed away Monday morning at 8:30 after a short illiness, due to acute indigestion.

Dahl Nivins ha spent most of his long life in Nevada County having been born in Selby Flat when that was a progessive mining town in 1856, his birth date being May 22. Here he attended school completing his education in Nevada City.

He was a mechanic by trade and for many years was employed in the shops of the N. C. N. G. R. R. Later he was associated in the old Allen foundry which is now known as the Miners Foundry.

He was a great lover of the out doors and enthusiatic fisherman having gone on a fishing trip just a few days before his death. He was an ardent gardner and no where in the city can be found lovelier roses than in the Nivins garden.

A loyal Nevada Citian although he spent part of his time in Mexico and Virginia he always called this his home. He was friendly by nature and enjoyed company. He was a highly respected citizen.

Funeral service were held Wednesday afternoon from the Holmes Funeral Home with Rev. H. H. Buckner conducting the service. Mrs. Louis Dorsey rendered a beautiful solo. She was accompanied by Mrs. H. H. Buckner.

The pallbearers were Archie Rowe, Harry Rowe, Walter Nivens and Milton Rowe, nephews of Mr. Nevens and D. E. Bleaky and C. R. Murchie, neighbors.

A large number of friends were in attendence at the funeral and the number of beautiful floral pieces attested the esteem in which Mr. Nivens was held in the community.

He is survived by his wife Mrs. Bessie Nivins, a sister Miss Jessie Niviins and a brother John. There are also a number of nieces and nephews.

MANY FROGS ENTER CONTEST

ANGLES CAMP, May 14.—Jumping Frogs are arriving daily in Angles Camp to take part in the Interntional contest staged here May 16-17. Three high jumpers are on their way from Berlin, Germany, one from Cork, Ireland and Paris. "Smoke" and "False Alarm" entered by the Washington. North carolina Fire Department landed here last Thursday. The states of New York. Virgina and Alabama are sending prize hoppers. The 1930 winning jump was 12 feet ten inches by "Pride of San Joaquin," owned by L. Fisher of Stockton.

Besides the frog contest, another important part of the celebration will be a pioneer parade, estimated to reach 3 miles. In the parade there will be a 16 mule jerking team, covered wogons, one to be pulled by 12 oxen and other early day modes of transportation.

The town will be decorated in an original manner in keeping with the early day spirit. Two hundred frogs of card board measuring 3 feet will be suspended from steamers. A large 25 foot painting, showing the old be placed at the north entrance of the town.

JUMPS BAIL

J. H. Lee of Sierra City was in town Wednesday enroute home from a trip to Oakland where he was called as a witness in the case of D. H. Dutton and R. L. Roberts in the court of Superior Judge John J. Allen which was to be held on Tuesday.

When court convened it was found that Dutton has skipped forfeiting his bond of $10,000 which had been put up by Herman Harice, bail bond broker of Oakland.

Dutton and Roberts were arrested for swindling George Deglantoni of San Francisco of $3,000 in cash and property worth $40,000 in the Sierra County Power stock .

At a previous trial the jury disagreed, Roberts is still in jail.

Dutton held an option on the Monarch Mine at Sierra City, which is owned by Mr. Lee.

ENGLEBRIGHTS RETURN FROM TRIP TO HAWAIIAN ISLANDS

Congressman and Mrs. Harry L. Englebright returned to their home here Saturday evening from a hurried trip to the Hawaiian Islands, where the Congresman went as a member of the Committee on territories in the House to investigate the the possibilities of Hawaii becoming the 49th state of the Union. Congresman Fess of the Naval affairs committee and Mrs. Fess also made the trip.

They sailed from San Francisco on April 23 on the U. S. Army Transport Somme. They were greeted

Congressman Englebright

on board with a beautiful Bon Voyage Basket filled with fruit nuts and candy, the gift of Nevada County Chapter Mining Association.

They had a smooth and delightful trip to the Islands where they arrived on the morning of April 29th. A royal welcime awaited the visitors. Aeorplanes from the Island circled over the ship and they received an aloha from Governor Judd in a radiogram extending to the distinguished visitor the curtesy of the Island and including an invitation to be guests of honor at a luncheon on May 1.

As they entered the harbor they were met by three launches. The first containing the Adjunct of Governor Judd Second Admiral Ripley Commander of Pearl Harbor, and the third representing General Wells Commander of Scofield. All three representatives were laidened with beautiful floral leis which were thrown over the heads of the visitors until they were fairly smothered.

On the docks they found the Infantry Band playing for their honor and a deligation from the chamber of Commerce.

The day was spent inspecting Pearl Harbor with the idea of making a report on certain naval improvements there. They were luncheon guests of Admiral Kipley.

On April 30th they spent the day at Scofield, the largest Military post in the United States, with 13,000 men stationed there. As they entered they were given the Congressional salute of 11 guns. They viewed the fortifications and housing conditions of the soldiers and will make certain recommendations to Congress for improvement. General Wells entertained the Congressman and their wives at luncheon.

On the evening of the 30th they witnessed a delightful program put on at Waikiki Beach for the Benefit of the members of the California Press Asociation as well as the visiting Congressman who were visitors on the Island. The finest Hula dancers and native singers took part in the program as well as the Royal Hawiian Band.

May 1st they were guests in the morning of the Mayor of Honolulu in the offical stand to witness the Lei Day pagent which corresponds with our May Day, and the crowning of the Let Queen who was a decendent of the old Royal Family of Hawaii. The performance was a magnificant spectacle with a profusion of lovely flowers used.

Immediately afterwards they were escorted to Washington Place the old Rayal Palace where a luncheon and reception was held in their honor and to which all the high officials of the Islands had been invited. The luncheon was typical Hawaiian. The Royal Band and native singers furnished a delightful accompaiment.

At the conclusion the Congresman confered with the political leaders of the Islands., as to some of the problems confronting them. Two thirds of the population of the Island is Oriental the remaining third or Caucasion race including the natives of the Island as well as a large number of Porto Ricons. The Orientals of which the largest porportoin is Japanese also control the vote having more thon 50 per cent of the voters. Both houses voted to become a state but it is was voted by the governor.

They found conditions in the Island excellent. There is no unemployement and there is plenty of money. The trade was partically normal and indications are that it will increase yearly.

They sailed on the afternoon of May 2 again overwhelmed with lies and honors. As they reached Diamond Head the officers stood at attention and all the leis were thrown overboard signifying they would return again.

They encountered two days of stormy weather on the return trip but all proved good sailors.

SEVERELY INJURED

Stanley Ellis, who is an employee of the South Yuba Development company, was struck on the top of his head by a rock and a deep gash inflicted. He was at work in the mine and a rock forced from the bank by the monitor, struck him. First aid was given at the mine and he was later brought to the Nevada City Sanitarium where Dr. A. H. Ticknell rendered the necessary surgical attention.

WIN DIPLOMAS

Nevada City students who received their diplomas from the University of California at the annual commencement exercises were Miss Helen Frances Jones, daughter of Judge George L. Jones and Mrs. Jones. Miss Jones, a graduate of Stanford took a post graduate course in the College of Librarianship. Miss Frances Harriett Davey was given her diploma in the College of Letters and Science.

Poor Little Wild Flowers

RIVER PLACER LTD, MAKES PROGRESS

Superintendent L. A. Smith of River Placer Ltd. was in town on Wednesday purchasing supplies and stated that their work was making progress.

At present they are deepning their shaft prepatory to cross cutting to the channel which has been definitely located at 25 feet from the shafe.

They are also continuing work in the south drift and producing low grade gravel from the bed rock on the south rim.

In the conjunction with this work they are sinking a new shaft about 600 feet upstream from the present workings. Bedrock is expeted in the new shaft at 35 feet in about two weeks.

WILLIAM BOSCH DIES AT DOWNIEVILLE

William Bosch who has lived practically all of life in the mountain town passed away Monday afternoon in Downieville at the age of 65.

He is survied by his wife Mrs. Bosch and daughter, Mrs. Leo Bessler of Downieville, a brother, Fred Bosch of the same city and a sister Mrs. Carrie Meroux of San Francisco.

The funeral was held at the Native Sons Hall Wednesday afternoon with J. M. MsMahon conducting the service. He was a charter member and a past president, of the Downieville Natice Sons. A Choir composed of Mrs. W. L. Carter, Mrs. A. Lavezola. Mrs August Costa, Miss Josephine Tomola and Ross L. Taylor, with Mrs Ida Sinnott as organist sang several hymns adding much to the impressiveness of the service.

The following old friends acted as pallbearers: August Costa Anton Costa, H. S. Tibby, Antone Lavezola, John Bernhardt and Frank Rogers.

Alva Hooper of the Holmes Funeral Home was in charge of the service.

MRS. GEORGE FORTIER FETED ON MOTHER'S DAY

Mrs. George Fortier of Nevada street was given a happy suprise family reunion at her home on Mother's Day. Unannounced, her sons, George J. Fortier and his wife and two children of Pacific Grove; Ralph W. Fortier of West Los Angeles; her sister, Mrs. T. M. Limnell and the latter's son, James J. Murphy of Woodland; her grand daughter, Miss Gertrude Margaret Howarth of Woodland, and the latter's father C. J. Howarth of San Francisco, and her cousin, Judge Bryan Lyons of Washington, invated the home.

Mrs. Fortier was overcome with the joyful surprise and soon regained her composure as greetings over the day was spent happily, with a splendid dinner served before time to say goodbye arrived.

MIGHT BE SECOND WEEPA

A clipping has been received by The Nugget from an Omaha, Nebraska paper of German extract proporting that an abandoned mine near Nevada City which proved to contain quartz with the enormous value of $50,000 per ton. One B. De Lano claims to have made a thorough investigation of the property which the article states will be opened up in a short time. His picture holding some of the gigh grade ore was also shown.

We might look for a second Weepa made up of Middle Westerners who read the German papers.

INTERVIEWED LEGISLATURE

Miss Annie Rush Byrne was a Sacramento visitor Monday. While in the Capital she interviewed the members of the Legislature in opposition to Cassidy's S. B. No. 630. Miss Byrne has had considerable experience with bogus stock sellers and did not want a reptition. The members of the legislature whom she was unable to see personally she typewritten a letter and left it on their desk together with her personal card.

She was given the curtesy of the United Press typewriters to carry on her good work.

She returned to Nevada City feeling greately recompensed in her labors.

LAKE VERA PREPARES FOR CAMP FIRE GIRLS

Lake Vera is a very busy spot these days with work being rushed at a high rate of speed in preparation for the two thousand Camp Fire Girls who will spend their summer vacation on the Lake at one of the camps.

Miss Kendall, executive for the Oakland Camp Fire Girls, has been here for many weeks putting their camp in first class condition. While the water in the lake was low the lake bed was scraped and deepened to make a better swimming place for the girls. The camp was cleaned and generally renovated.

Frank Davies and Thorn English, who are owners of Lake Vera with Wm. Griffith, have been digging a ditch from the Goring place to the lake preparatory to laying 12,000 feet of pipe line to the various camps. The ditch line has been completed and they are waiting for the shipment of pipe to complete their work.

Within the past two weeks 60 acres of the west end of the Lake was purchased for a camp for the Piedmont Camp Fire Girls. The work at their camp is going ahead at record speed and when completed the Piedmont girls will have one of the finest camps at the lake. The cement floor is being laid for the kitchen which will be about 22x24 feet. Sanitary facilities are on the grounds ready to be installed. Ten men are employed to do the work.

The first contigent of girls are expected to arrive about the middle of June and all possible speed is being made to have everything ready upon their arrival.

DOWNIEVILLE STAGE DRIVER PASSES AWAY TUESDAY

Charles Hartling, a native of Downieville, who drove stage for years, died at the county hospital in Downieville Tuesday afternoon. He had been ill for a long time and his death was not unexpected. Nearly all of his life had been spent in the county seat whehe he was known by everyone, and universally liked. A natural love of horses lead him to the occupation of stage driver and he was known all through the mountain sections where he had driven stages.

He is survived by two brothers, Ben Hartling of Downieville and Val Hartling of San Francisco, and one sister, Mrs. Mary Cook of Dwnieville.

The funeral was held Thursday afternoon. He was 70 years of age.

LITHOGRAPHED MAP OF MOTHER LODE COUNTIES

The Nugget is in receipt of a beautiful lithographed map of the Mother Lode counties which has been prepared in conjunction with the celebration to me held in Mariposa the last of June.

The various towns and historic places are depicted by drawings which represent some event which transpired in that particular spot. A key to the map gives the date happening. It is artistic was well as interesting.

The work was done by the California Art and Engraving Company and sells for $1 a copy.

NEXT WEEK CLEAN-UP WEEK

The meeting held Monday night by the Women's Civic Improvement Club was well attended and very interesting. Mrs. P. G. Scaddem presided and various matters of civic importance were discussed.

Next week was set for the annual clean-up week. Citizens are requested to burn the dry grass along the streets fronting their premises and in vacant lots owned by them.

A convention is to be held at Placerville on Monday, May 18th, and the club hopes to have a large number of its representatives in attendance.

Mrs. Wright reviewed the following books: "The Grand Hotel," by Vici Baum; "Festival," by Struthers Burt; "The Education of a Princess," by Marie, Grand Duchess of Russia.

BACK FROM LAKE TAHOE

Mr. and Mrs. Fred C. Worth have returned from a motor trip to Lake Tahoe and State of Nevada points. While at Virginia City they visited the Crystal Palace, a celebrated resort erected by Joe Douglas, Mrs. Worth's uncle.

THE NEVADA CITY NUGGET

CONCENTRATES

A man may be a real estate dealer, or agent, a calling which has by more recent usage been quite sensibly shortened to relator, but to legally call himself a "realtor" he must now be a member of the elite.

This is a part of the text of a bill which has recently passed the assembly. The word "realtor" has been sanctified, so to speak, can be legally used only by the favored association which has sponsored this bill.

Is there any judge or jury that will ever uphold the right to monopolize the title of a business profession such as this bill seeks to do?

Just another one of those assinine creations which always creep into the flood of unnecessary legislation at each biennial session.

* * *

The state raises and distributes, with great care an expense, millions of young trout every year to the end that the sport of fishing will not end.

It exacts from each fisherman a fee of $2.00 for the privilege of dangling a hook in our streams and we doubt if there is one fisherman in ten who gets in value fish enough to pay for the cost of his license every season.

Now, both branches of our lawmaking body at Sacramento have approved and are about to pass a law which makes it a criminal offense to fish along streams which run through private property. All that it is necessary to do is for the landowner to forbid trespass on his holdings.

It is easy to see what will naturally follow, for practically all landowners will take advantage of such a law to hog the streams and the fishing, even within vast tracts of unimproved land, for their own and their friends' use.

Fishing will become just as efficient a pastime as hunting ducks, and there isn't much use going gunning for ducks unless you have either a membership or a strong pull with one of the numerous duck clubs which monopolize all the available feeding grounds.

The game hogs who carrly sufficient influence with the fish and game commission have had the mountain quail season advanced to such a date that those sportsmen who live here in the mountains have no chance whatever at this king of California game birds.

By the time the season opens, which is the first of December, the birds are all down out of the mountains seeking the lower altitudes where they become the prey of the favored sports.

Besides the mountain quail these hills are also the natural habitat of the deer and these same privileged sportsmen lose no time in getting here as soon as the deer season opens. They come in such numbers that it is becoming really advisable, if you are in the habit of roaming in the woods much, to wear a red shirt and carry a bell unless you wish to take chances of being shot.

This trespass law is another of those phohibitions which the great majority of the people do not want. Advocated at the behest of a few private landowners in the Southern part of the statefor purely selfish reasons it gets the "do pass" stage by legislative committees undoubtedly through vote trading, which in these times seems to be paramount to what the people of the state do or do not want.

Fortunately there is one way left in which this vicious bill can be killed, and that is by the referendum.

Angling is about all that is left in the rapidly diminishing field of recreation. It certainly is the least harmful and least dangerous of sports.

What real harm or damage to the ordinary land bordering a stream can be caused by the mere whipping of the stream for fish? Of course there are a few vandals, like there is misfits in all walks of life, but why penalize all humanity for the few?

If this bill passes, let us see that petitions for referendum are started at once. It will be but little effort to get all the signatures necessary.

* * *

It is no wonder that the bill to permit the sale of mining stock without the scrutiny of the state corporation department is meeting with great opposition.

Unrestricted sale of mining Exchange and as that body, according to some of the leading security companies at the bay, has a reputation that smells to high heaven, such sponsoring does not lend any prestige to the bill.

As far as we of Nevada County are concerned-- things are bad enough as they are; even with what cenership the corporation is able to give.

If there is anything that can give a good mining camp a bad name it is to have some cheap promotor get hold of a small property and allow him full sway with printers ink. There has been plenty of it done here already in this district and it had errect in depressing legitimate mining.

The promotore who put out this lurid and false literature never do any constructive mining. They are not of that type. They invariably exploit the mine and the community and divert the funds that may reveive to their own use.

To again open the restrictions on mine promotion would be like loosening a horde of pickpockets from the penitentiary. Instead of being a benefit, it would be the most disastrous thing we could possibls do to the mining we are trying to build up.

The former open season for mining promotors is responsible, more tan anything else, for the stigma connecting the word swindle with mining operators.

No, we do not need that kind of help. It is not necesary to either lie or exaggerate about what we have here in Nevada County's mining field. All that is necessary are the cash, honesty and good judgement to increase the growing list of producing properties already in the district.

PERSONALS

Mrs. J. L. Taylor of Hollywood was a visitor at the Frank Davey home here this week. She took advantage of the low rates offered by the Southern Pacific to visit her mother Mrs. Ann Davey over Mothers Day and then spent a night with her brother's family. She returned to her home at Hollywood Thursday accompanied by her mother.

Thomas Bessler went to Downieville Wednesday to attend the funeral of the late William Bosch.

Henry H. Myers, Downieville Merchant was in town Friday enroute to San Francisco for a few days trip.

Mr. and Mrs. H. Blanchard of Sacramento visited Sunday as the house guest of Miss Florence Genasci of this city Mrs. Blanchard was formerely Miss Morg Sofge and has often visited in this city.

J. H. Hartley engineer of Los Angles was in town early in the week making reports on some mining properties in the district.

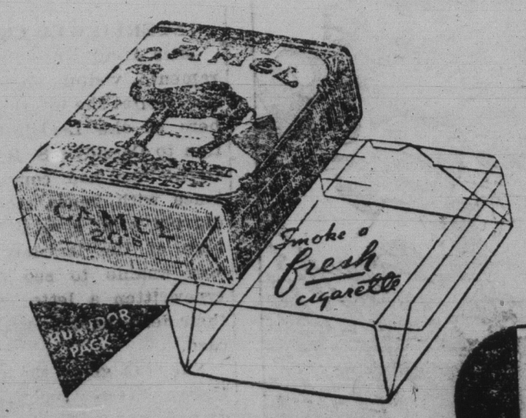
LEE R. WOMACK, 448 Tenney Ave., Amherst, Ohio
J. ARTHUR WOOD, 21 Burke St., Mechanicville, N. Y.
EMERY HERBERT YOUNG, Painted Post, N. Y.



IN congratulating the winners in the great Camel contest we want at the same time to thank most cordially the approximately million men and women who displayed their friendly interest by sending in an entry.

We wish also to thank the millions of smokers throughout the country for the appreciation they are showing for our new Humidor Pack as is evidenced by the notable increase in the sale of Camel cigarettes.

By means of this dust-proof, germ-proof, moisture-proof Cellophane wrapping the rich aroma and full flavor of choice Turkish and mellow Domestic tobaccos have been air-sealed in Camels for your enjoyment.

If you have not tried Camels in the Humidor Pack all we ask is that you switch over to this brand for one day.

After you have learned how much milder, how much cooler, how much more enjoyable it is to smoke a perfectly conditioned fresh cigarette, go back to the harsh hotness of stale cigarettes if you can.

FISHING ONE OF MOST POPULAR SPORTS

Reports from angling license sales in many districts reveal that fishing is one of the most popular sports. Of course it is impossible to make an accurate sales tabulation at this time, but early indications show that the drought has not frightened many anglers.

As a matter of fact, it is beginning to appear as though the dry season has enticed more early anglers to streams and the usual procedure in former yearh. Sporting goods houses, no doubt are doing an uncreased business.

At this time of year, in former seasons, many of the streams were so high that good anglin was an impossibility, and the sportsmen naturally collected on the shallower tributaries. This year the tables seem to be somewhat reversed, with west of the fishing on the large streams and the tributaries virtually abandoned. Lakes will receive big play.

Fish culturists of the Division of Fish and Game are somewhat worried over the change in conditions. According to their calculations conservation is going to suffer a serve blow if the anglers concentrate too heavily on the fishable waters.

Fishing that is done too intensely will so deplete the waters that it is liable to take several years to make any sort of a recovery, according to culturists. This will be espically true in the lakes.

Sportsment's and associations can do a great work if they will encourage their members and friends to use good common sence in working the streams and not allow certain waters to be fished.

GOLD BOOM IS GRIPPING WEST

A regular old-time boom is getting under way throught Nevada and California, according to M. Wallace Wooley, ore purchasing agent for the United States Smelting company who returned from a tour of several of the old sections a few days ago.

Activity around Tonopah, Gilbert, Chloride Cliffs, Beatty and other sections is being given impetus with the renewed demand for gold and the low price of commodities, Mr. Wolley states. A rich shipment was recently made from Ellensdale, located east of Tonopah, he reports. A small shipment went 15 ounces gold to the ton. The company is following a small streak of high-grade gold claim a quantity of $20 ore.

The most imprtant silver lead strike in recent years has been made at the Santa Rosa mine, located 27 miles northwest of Keeler, California, according to Mr. Wooley. Two ore bodies have been opened up in different parts of the property and several men are working on the strikes preparing the ore for shipment when metal prices improve. The ore averages 80ounces silver to the ton and 45 per cent lead, he states.

The Santa Rosa was formely under operation gy the United States Smelting company, which recently gave a bond and lease on the property.—Mining Review.

ANNIVERSARY OF TICONDEROGA BATTLE

Early in the morning of May 19, 1775, the "Green Boys" of Vermont, numbering ess than ninety and led by Ethan Allen, surprised and captured the British garrison at Fort Ticonderoga. Included in the capture were two hundred cannon which Henry Knok later dragged over the mountains to Boston where thew were used to good advantages by General Washingtn in his siege of that city.

In recalling the 166th anniversary of this event the Division of Information and Publication of the Gerge Washingtn Bicentennal Commission marks is as one of the significant dates to be commemorated in connection with the Celebration of the Two Hundreath Anniversary of the Birth of George Washington.

The nation-wide observance of the First President's Two Hundredth Birthday Anniversary has been prepared by the national Commission in charge to be the greatest commemoration of its kind ever held. All-inclusive in scope the Celebration provides for the participation of every man, women and child in the nation. Programs are being prepared to be held in every schoolhouse, church, and meeting place in America. Extending even beyond the boundaries of America it will include the citizens of the United States living abroad as well as the people of all foreign nations who wish to honor the memory of George Washington.

The spectacular attack on Ticonderdga occurred less than a month after the opening gun of the Revolutionary War fired at Lexington. It was carried out by men who appreciated the grim significance of the event, and who were determined not to turn back until Independence had been won. The spirit which actuated the attackers was clearly shown in their forsake the enterprise when Allen gave one the opportunity to withdraw just before the attack was made.

When the Americans had forced forced their way into the Fort they proceeded to the quarters of the commandment, De La Place. Colonel Allen confronted the Brinton with demand for his surrender. According to Washington Irving in his Life of Washington, La Place wished to know by what authority the demand was mate ant received the now important reply, "In the name of the great Jehovah and the Contintental Congress." Resistance appearing futile the garrison surrended and Ticonderoga pased into the possessin of the Americans.

TUOLUMNE RIVER MINE BONDED

SONORA, Calif, May 14.—Walter Barrett, of Soulsbyville, has granted to William McGee and J. A. Hopkins, Oakland, Calif., mining men, a lease and bond on his Mayflower group of three claims on the north fork of the Tuolumne River, three miles southwest of Confidence. They have started operations by resuming the extensions of a 240-foot crosscut tunnel, which, it is calculated should within an additional 50 feet interest a vein which in another tunnel of shallow depth has a width of two feet and gives values of $19 a ton in gold. The tunnel under extension will tap the vein at a vertical depth of 150 feet, it is stated.

William Thrower and H. A. Dustin of Aubery, Fresno County, California, have taken over from N. W. Moodey, of Sanger, Calif, under a lease and bond the Opulant group of two claims, formely known as the Kanaka mine, near Groveland and are preparing to actively operate the property.

VACATION TRAFFIC HAZARD EMPHASIZED

Approch of the summer school vacation period is the motive from a safety poster and accompanying lesson data which Public Safety Department of the California State Automobile Association is distributing to 13,000 classrooms in Northern California. The set of safety instructions material is the thirty-fifth of a series distribuated monthly to the schools by the mtorists' orginization. Effective cooperatin in this educatinal effrt is being given by teachers and school authorities.

The poster just issued is designed for display in classrooms and depicts a group of children setting out for a day of vacation pleasure. One of them points to a sign beating the legend "Safety First." The lesson suggestions submitted for use by teachers are provided in the following out line:

The coming months of the vacation period are turned from days of happiness into days of sorrow in the homes of children who forget the lessons of caution learned during the school year.

Summer vacations is the time when there are more automobiles on the streets and highways. Police records show that the child accident hazard reaches its peak in the months of June, July and August.

"Teachers are urged to have the children renew their resolutions to be careful, so that they may come back to school in September well and happy.

IMPROVEMENT NOTED IN CAL. LAND RESOURCES

A through survey of California landresources, just completed by the Bank of America, indicates a distinct betterment in both the prices and the production future of general major agricultural and horticultural products and a renewed interest in mineral lands and their output.

Improvement has already set in to such extent that the bank feels justified in stating that "prices on commodities where the product is below normal promises to be better than in 1930". The survey showed that the hop market has stiffened from four to six cets a pound in the past few weeks, bringing this prodct well over the point where production and marketing cost ends and profit begins, that hay has advanced by two or three dollars a ton in the last thirty days and that there will be an actual shortage in both hay anu grain.

The survey sets forth that many buyers of abricultural lands have companies within he past few months, and are appraising the desirable lands actively. These buyers are being given to understand that it is not likely that California agrarian acreage will go any lower in price. Land values apparently have shrunk to the limit, the survey points out. The inflated valuation placed on the inferior land in the state has virtually all disappeared, and all land is about to its true price level.

Odly enough lertain factors of the the shortage of water and the scientific encouragement of volume production, have combined to bring about an actual betterment of conditions in many respects. The prune crop, it is indicated in the survey may be as much as 40 per cent below normal in volume, obviating the market glut that prostrated prices in 1930 and allowing much more latitude for quality production and more promising financial returns. Lack of water prevent a considerable portion of the peach crop from sizing up as it should, but in every other respect it is expected that the general fruit crop quality will be up to the normal standards. A somewhat shorter grape crop is predicated, due to the vine pulling campaign and shortage of water and to the natural rotation of crop of diffrent degrees of volume. The grape output for the past few seasons has been unusually heavy and a lighter bearing season is now in prospect. The grape leaf hopper has also been more than usually active, and this factor is bound to cut production to some extent.

Both the cotton and the bean acreage have been reduced because of lack of adequate water. In addditon the cotton growers have actively engaged themselves with the problem of low-productive and in many instances have cut off this land to develop volume production on their remaining acreage. There will be a big crop of almonds, possibly above normal. The first cutting of hay has all been shipped out of the Imperial Valley and there is very little old hay to be obtained there. The alfalfa output everywrere is moving rapidly, stimulated by a good market.

The observation is made from this survey that agriculture in California is getting on a firmer basis because the holder of the land and the bank or finances company that finance it are beginning to realize the folly of throwing good money after bad in maintaining consistently low producing acreage. Much more remains to be done in this regard, the survey points out. Volume production on the good acreage and the turning over of the low production soil to other uses ore the objective that are being striven for. "Better a good is one cogent that has been set forth in the survey.

While the livestock industry it not responding as well as some of the agricultural and horticultural commodities, the whole situation of land resources justifies the conclusion that conditions are more favorable here than is the case with many of the commodities and operations represented by stock market prices. Any true survey of the land resources situation in California must show many bright spots, and the fact that the present economic depression has forced certain readjustments that are actually resulting in present benefit.

While the bank's approximation of the land situation concerns itself almost solely with agricultural holdings, it was brought to the attention of the institution that renewed inquiry is stimulating the interest in mineral lands, particularly in the well proven holdings.

The facts in the survey were compiled by the agricultural field force of the bank.

OPERATIONS STARTED ON PUNCH BOWL PLACER

JAMESTOWN, May 14.—Under the supervision of J. S. Cademortari of Sonora, Edward Cross and associates if Los Angeles have inaugurated operations at the Punch Bowl placer mine, three miles southwest of here, under a lease and bond from C. E. Shafer, of Jamestown, the owner. Eight miners are now engaged in cleaning out a 1500-foot tunnel, extended several years ago. From it a raise was run 40 feet to the bedrock and from its top a drift was advanced 300 feet north up stream in an ancient river channel. According to reports, excellent gravel was obtained therefrom.

RENEWAL OF USED MOHAIR CUSHIONS

When the nap of mohair upholtered cushions in the car becomes worn from constant use a simple remedy, usually effective, is worn from constant use a simple remedy, usually effective, is suggested by the Free Emergency Road Service of the California State Automoblie Accociation. Saturate a bath towel or thin cloth in hot water, wiring it nearly dry and then spread and pat down over the affected portions of the cushions. This should be followeu by a through brushing.

LOCATION NOTICES—Quartz and placer location notices for sale at The Nugget office at 5c each.

The BEST Gray Hair Remedy is Home Made

To half pint of water add one ounce bay rum, a small box of Barbo Compound and one-fourth ounce of glycerine. Any druggist can put this up or you can mix it at home at very little cost. Apply to the hair twice a week until the desired shade is obtained. It will gradually darken streaked, faded or gray hair and make it soft and glossy. Barbo will not color the scalp, is not sticky or greasy and does not rub off.

If baby could be particular

...She'd have her mother cook with **ELECTRICITY**

"RIGHT NOW when I need the most care and attention, mother should spend almost all her time with me.

"But just when I want her, she has to be in the kitchen. If she would only let an electric range cook her meals and daddy's automatically, she wouldn't need to stay in the kitchen—she could be with me."

It's easy to have perfect cooking without the usual bother of watching in the kitchen—when you cook with electricity. And that's because of the time and temperature controls. You simply place the food in the oven, say at one o'clock, and set the controls. At three o'clock the meal starts cooking. At six, the electricity turns off. The insulated oven keeps the food hot until you are ready to serve it. Think how nice this will be when company is coming for dinner on a day when you want to be free during the whole afternoon.

Then too, cooking with electricity is economical. The cost for current averages 1c a meal per person. Moreover, cooking elements are faster today—as fast as you'd want them.

A small down payment places the electric range of your choice in your kitchen, ready to use. Come into our office or a dealer's store and see the beautiful new electric ranges.

GASOLINE PRODUCTION AND DISTRIBUTION

"The Story of Gasoline," from the drilling of the wells for the production of the crude oil to the filling of the automobile tank at the service station, is visualized in a new edducational motion picture film preparedd under the supervision of the United States Bureau of Mines, Department of Commerce, in cooperation with an industrial concern.

The opening scenes consist of panoramic views of typical oil fields furnishing the crude oil from which the gasoline is distilled. Next are given views of a large oil tank farm where the crude oil is stored after coming from the wells. From the tank farm the crudde oil begins its long journey through pipe lines leading to the storage tanks near the refinery. Pumping stations located about 60 miles apart force the oil through the pipe lines under pressure of 400 to 600 pounds per square inch, andd views of the powerful machinery used in these pumping operations are shown. A map shows a portion of the 90,000 miles of pipe line by which crude oil is distributed to refineries throughout the Unitedd States.

Next are given scenes showing a modern oil refinery, covering many hundreds of acres and employing a great variety of mechanical equipment for completely processing the oil. In addition to gasoline, crude oil contains many other produdcts, and a diagram shows the percentages of naphthas, kerosenes, gas oils, lubricating oils, fixed gas, and dcoke obtainedd from a barrel of oil.

Gasoline is separatedd from crude oil by distillation. In this process the oil is charged into stills and heated by fire, or fire and steam. Gasoline is vaporized and subsequently condensed. Animated drawings and actual photography are used to acquaint the audience with just what takes place within the stills and condensers. Before charging, the crude oil still is filled with steam. This drives out the aid and avoids explosions. Large pumps force the oil from storage tanks directly into the still. The still is charged with crude oil and then fired. Gasoline and naphtha are distilled off first and these vapors passed into the fractionating power. The heavy oil is returned to the still for further distillation. The vapors are condensed then kerosene is distilled off ,then gas oil, then lubricating oils. The various cuts go to the fractionating tower where they are condensed by special equipment under accurate temperature control. All of these processes are made plain by the use of animated drawings or actual photography.

The last product obtained is petroleum coke, which is used for fuel, for the manufacture of electrodes, and for various other purposes.

Next is given a series of views showing the processes by which the crude gasoline is chemically treated for the removal of undesirable impurities. After chemical treatment the gasoline is subjected to final distillation for further purification and adjustment of the boiling point.

The quantity of gasoline naturally contained in crude oil and obtained by fractional distillation does not equal the demand. It has therefore been necessary to convert additional portions of crude oil into gasoline. "Cracking" processes which accomplish this are depicted in a series of views. Actual cracking is very complex. Its general principles are made plain, however, by animated drawings.

Another series of views shows how casing-head or natural gasoline is manufactured by collecting, compressing and cooling the gas from oil wells.

A series of scenes follows showing the tests made in the chemical laboratory to insure that the gasoline conforms to rigid commercial specifications.

Further scenes illustrate the various steps required in the storage and distribution of the gasoline which is ready to market. Views of refinery stroage tanks, having each a capacity of 3,000,000 gallons, are given. Enormous tankers carrying 2,500,000 gallons and railroad tank cars holding 10,000 gallons of gasoline are shown. The delivery of the gasoline to the main distributing stations and its transportation from these stations by tank wagon to garages and filling stations are next shown.

Copies of this motion picture film, "The Story of Gasoline," may be obtained for exhibition purposes by shools, churches, clubs, civic and business organizations and others interested by applying to the Pittsburgh Experiment Station of the United States Bureau of Mines, Pittsburgh, Pennsylvania. No charge is made for the use of the films, but the exhibitior is asked to pay transportation charges.

HOW TO KEEP TROUT IN EXCELLENT CONDITION

Many pounds of fine trout are wasted every year because anglers do not know how to preserve the catch. By proper handling it is posable to keep the fish in excellent condition while traveling far distant from mountain streams. Following are a few suggestions as offered by the Division of Fish and Game on the art of preserving fish.

Clean fish as soon as possible, wash and hang up to dry out. Do not put any more water on them. Hang outside at night. To keep trout several days before taking home, lay out over night to drain, then pack in Willow boughs or sod grass, a layer of fish and a layer of grass. Roll them up during the day in a damp gunny sack and lay out each night to air and cool.

Another method suggested is to wrap each fish in silk paper after cleaning and drying, then roll in a dry sack or piece of burlap and wrap again. The extreme outer sack may be wet, then carefully wrung out, and roped around the dry bundle. Keep in a cool place away from the air, inside if posible. Tie the bundle at the ends much the same as a tamale is tied. Do not open until the fish are to be used. Such bundles have been shipped in a box with ice for thousands of miles.

The theory of saving trout is to keep them cool, clean, dry and away from the air.

If fish are to be shipped in ice, this method is suggested: Put a lot of green grass blades or similiar material in the bottom of the confish separately in more green material and all are packed in, put a batch of green material on top. Put paper on top of fish letting paper down over sides of box. hen put in ice, broken in small frabments, to a depth of from four to six inches, fold paper back over ice, put more paper on top, nail on cover, and mark box "Perishable. This Side Up" The paper will exclude the air and the ice, melting very slowly, will trickle down through the packed fish

RATTLESNAKES QUITE PLENTIFUL THIS YEAR

Reports to the Division of Fish and Game from various sections of the mountains in this state indicate that rattlesnakes are quite plentiful this year. Undoubtedly many anglers and hunters will come in contact with these common reptiles and cases of snake bite are bound to be the results of such meetings.

There is really no reason to fear rattlesnakes. These reptiles will mind their own business and will generally try to escape whenever possible.

Few fatalities occur from rattlesnake bite. A person always hears about the most unusual cases and in most instances these are greatly exaggerated. It is extremely difficult to find a person who actually witnessed a case where snake bite proved fatal Ni.nety-nine per cent of the fatal cases can generally be traced to absolute carelessness and neglect.

Here is a simple remedy that has been recommended to the Division for rattlesnake bites: Do not run or get overheated, excited or take alcholic stimulants for either of these conditions speed up the blood stream and distribuate the poison much quicker throughout the system. Apply first aid measures, bleeding suction of the gang wounds, and get a doctor as soon as posible.

Most snake bites are on the arms or legs, acording to a survey of treated cases. Because of this, a lone person can usually administer first aid to himself. This should consist of applying a ligature or tourniquent a few inches above the bite; most any strong cloth will do or even a shoelace. Do not apply it too tightly, but firmly enough to retard circulation returning through the veins toward the heart. The tourniquet should be released every 10 or 15 minutes for about a minute, else gangrene may set in.

A cross cut incision should be made at each fang mark. Use a clean knife or razor blade and cut all the way through the skin about one-fourth of an inch deep and one-half inch long. Some of the venom will escape with the induced bleeding. Then apply strong suction to these incisions. Many sportsmen now carry an ordinary breast pump that can be bought at any drug store for a few cents; if the mouth is used there is danger of repoisioning through bad teeth or raw places in the gums or walls of the mouth. With either method, suction should be kept up for 20 minutes of each hour for 15 continuous hours or until swelling ceases. In any event, get a doctor as soon as possible.

Other advices given is not to take alchohol increases circulation and distributes the poison much more rapidly. Many authorities now condemn an old method, that of injecting the potassium permanganate which is now said to be of no "cures" or home remedies; most are founded upon fiction or superstitions. And remember these only first aid measure and recommended as such Play safe and get a doctor as soon as posible.

WILL CONTINUE SINKING KENNEDY MINE WINZE

SUTTER CREEK, Cal., May 14.—Sinking operations in the incline winze below the 4800-foot vertical shaft level of the Kennedy mine at Jackson has gained a depth of 150 feet vertically or 160 feet on the dip of the vein, it is learned. This gives the mine a total vertical depth of 4950 feet and more firmly than ever establishes it as the deepest gold mine in the United States. Preliminary to the inauguration of development work at the new depth, a station, it is asserted, is at present being cut at that horizon and preparations are under way to continue down an additional lift 150 feet vertically or 160 feet on the incline. The winze, going down in the footwall of the vein, is three-compartment in size the same as the 4800 foot vertical shaft from the surface.

A concentrating table is being installed in the five-stamp mill on the Verne Wheeler lease on the southern section of the Ballard mine four miles north of Plymouth, the development of which was recently resumed after being idle for practically half a century. Operating one eight-hour shift, the plant is daily reducing five tons of ore which is being extracted in the extension of a drift tunnel on a four-foot face of milling grade rock.

NOTICE

From now on the Colfax Bakery will supply their products to the Sacramento Street Grocery, Nevada City, California.

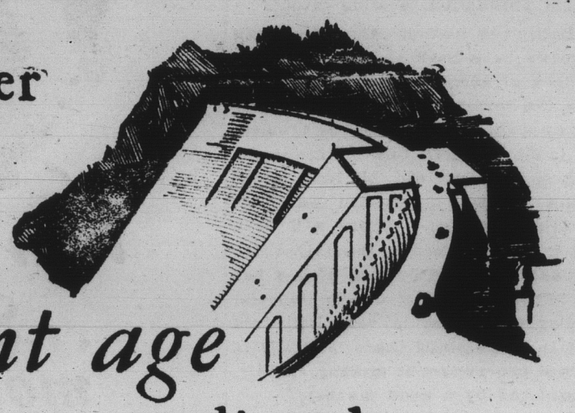
★ BUILDERS OF CALIFORNIA
Grandfather scoffed when the Cement age was predicted



THE PROPHESY: "Colossal concrete dams will store water for cities and valleys. People will walk on concrete, ride over concrete roads and bridges, live and work in buildings constructed with cement." . . . In Grandfather's time, a dreamer's vision. Today—The Age of Portland Cement.

Cement was first produced commercially in California only 33 years ago. Now the state's yearly output exceeds *twelve million* barrels, valued at more than $25,000,000.

With huge investments, large pay-rolls, wide distribution and seasonal "peaks" of demand—the cement manufacturer requires a strong, convenient, helpful bank.

Bank of America, financing thousands of construction projects throughout the state, knows the problems of builders and material men, and often has the privilege of assisting both. The contractor, the material company, the dealer and the owner may be at widely-separated points. But this Bank's statewide service brings them near together—frequently saving time and money for all.

With construction costs at the lowest level in years, conditions are now unusually favorable for building. You are invited to consult this Bank regarding the financing of a home or any building project.

CAMPTONVILLE ITEMS

CAMPTONVILLE, May 14.—The improvement work on the local town hall is nearing completion, and the community can now boast of having the best and finest looking all-around hall of any town in the mountains. What for years was rough board walls is now covered with the best grade of plasterboard, and the formerly bare ceiling glistens forth an ivory surface, with the floors, windows, and wainscoting a trifle darker shade. A small piece of floor, which was bad was taken up and new floor put in, and one-third of floor, which was bad

of the floor was taken up, trimmed and put loyn again. A better stage has been built, and one-third more room is now at hand for large crowds, two more lights were installed. The committee incharge report that the subscription list amounts to $115.50. The bills for the material, paint and labor ,will amount to a small amount more than the amount collected ,and the list will be kept open until enough is obtained to take care of the work in full. Several have expressed themselves as willing to subscribe and will probably do so at this time. This is a very worthy cause, and in as much as the hall is used by the community at large for any and all purposes without charge, it is expected that those who have not already contributed will do so.

The lodges of this Masonic District, including Sierra City, Downieville, Alleghany and Camptonville, met in a special meeting at this place as the Guest of Gravel Range Lodge No. 59 F. & A. M. and received Grand Master John Stewart Ross of El Centro. After the meeting a banquet was served in the Forest at the Meek Mercantile Company store.

M. F. Lusk of Downieville passed through town Thursday from Sacramento en route to his home.

Fred J. Joubert motored to Nevada City Thursday on a short business visit.

Judge George L. Jones of Nevada City was in town attending a lodge meeting.

S. Lee Leiter passed through town en route to Downieville on business.

E. Innes, E. Allison, James Cassell Richard, Thomas and Ben L. Hames of Sierra City were in town to attend the lodge meeting.

M. P. Fischer and John Woessner of Downieville were in town to attend the Masonic meeting.

Julius E. Pauly left Friday for Marysville on a few days business trip.

Henry Meyer of Downieville passed through town Friday en route to the lower country.

Miss Wanda Chatfield, who attends high school at San Andreas, spent the week-end visiting parents at Pike City.

Mr. and Mrs. George Sandow and son Vernon of Nevada City were in town Sunday on a short visit.

Misses Carrol and Eloise Nelson of Aptos are visiting their sister, Mrs. Fred H. Butz at Celestial Valley.

Judge and Mrs. William B. Meek spent Sunday visiting the Joubert home at Oak Valley.

Mr. and Mrs. Chester Butz of Oroville spent the week end visiting relatives at Celestial Valley.

FRENCH CORRAL ITEMS

Delightful weather continues but if our hillsides may retain their verdure we must have some showers of rainfall.

French Corral and the whole San Juan Ridge is certainly one of the beauty spots of the world at this time. To many of us is is always this.

Harvesting has begun already and soon the beautiful waving grain will be converted into winter hay.

Stockmen are moving cattle and sheep to the mountains. Two large droves containing many thousands of head visited our hill slopes during the past week. They belong to J. Hartley of Wheatland.

The Buck Bar of Granitiville pased through with their fine herd, Thursday.

H. Browning, assisted Wm. Welsh of smartsville in taking his cattle to the mountains Thursday.

W. P. Clerkin brought his cattle from the town ranges to his ranch near French Corral and was busy during the week with branding and getting ready for the mountain trip. The wonderful intelligence of animals is shown in this, when the time comes to move them to the mountains it is almost impossible to hold them back. Some of Mr Clerkins cattle poke out and started on ahead.

H. Hoskins and family are moving to French Corral this week. They will leave in the chas French Corral.

Kate Hays Flat, near French Corral.

Mrs. E. Swetherland made a trip to Nevada City Wednesday, for medical treatment.

Fred McFillan of Oakland paid a visit to French Corral Thursday. His family lived here 40 years ago, and moved to Oakland when Fred was 5 years old. They were related to Nevada City Wednesday for medical treatment.

Mr .and Mrs. Wm Moore of San Francisco are visiting their relatives, the O'Cornor family of Birchville. Mrs Moore is the daughter of the who was electrocuted some years ago while in the employ of the P. G. &E at Colgate.

Columbia Parlor, No. 70. N. D. G. W. held a meeting Saturday afternoon . They elected Mrs. Elsie Schwartz deligate to command Parlor and Therisa O'Cornor as altermates. They also held a school program commemorative of Mother's Day.

Wm Gordon of Sacramento has returned to French Corral.

Mrs W. E. Moulton spent two days in Nevada City with her daughter Mrs L. Dudley, who had been ill during the week. She returned to her evening bringing Mrs. Dudley with her. Her daughter Frances of Sacramento, also accompanied to spend the week end.

Benton Wilcox visited his Mother Mrs. J. W. Culver, saturday.

O. W. Winburn of Grass Valley accompanied by mining men from You Bet visited this place Saturday and Sunday.

Lolyd Dudley and W. E. Moulton made a trip to Marysville Sunday to meet Mr. Moulton's relatives Mr. and Mrs. Theadore Witzel who were visiting with Mrs. Witzels's sister Mrs. Thos. Fogarty of Marysville.

Mr and Mrs. P. H. Flyn of Nevada City accompanied by there daughter Mrs. McYotz and baby daughter and Mrs. Flyn sister Mrs. Wm-Walsh of Shasta were Monday visitors.

All mourn the tragic death of James Dillon whose family was well known to many on the Ridge and in this place, and extended deepest symphaty to his wife and relatives.

Third Around Pacific CRUISE

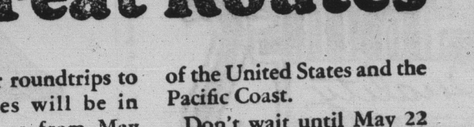
To 19 STRANGE PORTS on the great MALOLO

Finer than ever—the *third* Around Pacific Cruise of the luxurious Malolo! Wild New Guinea is included this year! Macassar in Celebes! Batavia in Java! Singapore, Shanghai, Bangkok! Nineteen strange cities in 14 lands of Asia and the South Seas.

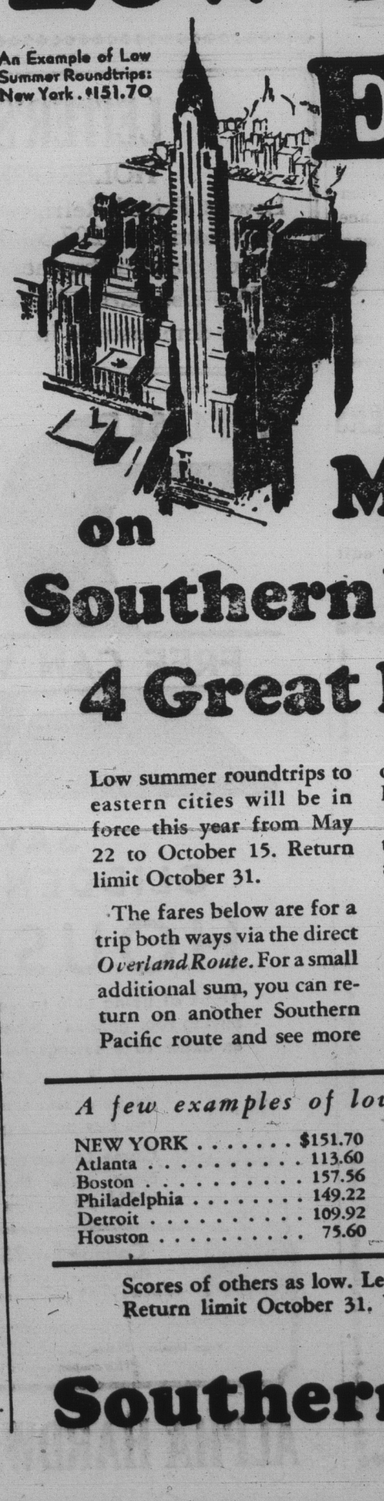
Ashore, amazing adventures await you—visiting the Sultan of Johore's palace—mingling with worshipers before the Emerald Buddah—watching exotic dancers in Siam, Fiji, Samoa. All this, for as little as $1,500!

Ideal cruising season—glorious autumn in the Orient, balmy spring in the South Seas! Sail Sept. 19 from San Francisco (20th from Los Angeles); back again Dec. 16. Ask your travel agency about this luxurious adventure—or write us.

MATSON LINE 215 Market Street • DAvenport 2300



Low Fares East



Start May 22 on Southern Pacific's 4 Great Routes

Low summer roundtrips to eastern cities will be in force this year from May 22 to October 15. Return limit October 31.

The fares below are for a trip both ways via the direct *Overland Route*. For a small additional sum, you can return on another Southern Pacific route and see more of the United States and the Pacific Coast.

Don't wait until May 22 to plan your trip. Tickets are on sale *now!*

And before you plan, ask your local agent for a copy of the free, profusely illustrated booklet, "4 Routes East," or write E. W. Clapp, 65 Market Street, San Francisco, for a copy.

A few examples of low summer roundtrips:

NEW YORK	$151.70	CHICAGO	$90.30
Atlanta	113.60	Kansas City	75.60
Boston	157.56	St. Louis	85.60
Philadelphia	149.22	Minneapolis	91.90
Detroit	109.92	New Orleans	89.40
Houston	75.60	Washington, D. C.	145.86

Scores of others as low. Leave May 22 to October 15. Return limit October 31. You can buy tickets *now!*

SHOT GUN MINE INSTALLS MACHINE DRILLS, HOIST

SAN ANDREAS, May 14—Following current installation of a four-drill air compressor, machine drills and a 25-horsepower gasoline hoist, sinking operations are to be resumed in the incline shaft on the footwall segment of the main vein, now down 100 feet, on the Shotgun mine, seven miles south of San Andreas, which is being operated by George H. Harrison, of Oakland, Calif., under a lease and bond from the owner, Mrs. Julian Waters, of San Andreas. Three shifts of miners, in place of the present one shift, will be employed. in the new shaft work, it is stated. In the shaft the orebody exposed shows an average width of three feet and assays $50., a ton in gold, is is learned. Operators are being directed by W. H. Cordes, formely superintendent of the Morgan mine at Corson Hill.

Charles Clark and Joaquin Leonard, owners and operators of the Red Top mine, three and a half miles north of Murphys, are installing there a 10-ton bell mill, two concentrating tables and other reduction equipment, following which sinking is to be resumed in a 100 ft. incline shaft on a vein averaging in width three feet and in value $50., a ton in gold, it is stated.

Sinking operations in the new incline prospect shaft on the Norfolk gained a depth of 110 feet. The bottom of the shaft is exposing two and a half of ore of good milling grade. At the 150-foot point, when reached by the shaft, crosscuts will be extended to two closely situated paralled veins for exploratory purposes.

Fred Zurcher of Murphys has taken a lease and bond from John and Antone Solari on a 310-acre tract of placer gravel ground, one and a half miles east of Vallecito. He will continue a tunnel, now 300 feet in length, to tap an ancient river channel.

FAIR PLAY ASKED BY SPORTSMEN

Contending that the best interests of the state would thus be served and that a "moral obligation" of fairness to sportsmen is involved, the Sacramento-San Joaquin River Problems Conference has petitioned President Hoover for annullment of recent federal regulations shortening the open season for ducks in California.

The petition, in the form of resoultions adopted by the Permanent Committee of the conference, bears the signatures of a dozen leaders in the matter of water conservation and agriculture stability ,and charges discriminatory action.

Admitted existence of a water shortage throughout the state, with the probable necessity of curtailing impoundment of water in duck ponds and the consquent checking of early flight of migratory fowl into California, the petitioners declare, makes shortening of the season doubly harmful.

The regulation involved was ordered March 19 by the Department of Agriculture, through the Bureau of Biological Survey, and would terminate the open season for ducks December 31 instead of January 15, as heretofore. The order was sanctioned by the President.

The conference resolution charges that the regulation was imposed with out consulation with the California Fish and Game Commission or with California representatnves to the Advisory Committee of the Bureau of Biolobical Survey. It declares that Great Britain and Canada, the other contracting parties to the Migratory Bird Treaty, under which the regulator power is carried, have made no such regulations "thus placing California in an unequal position and causing sacrifice to the people of this state."

Co-operation of California sportsmen on the occasions of previous water shortages, it is contended, creates a "moral obligation of fair play" on the part of the government.

Signers of the petition include E. L. Adams, president of the Rice Growers Association, Chico; A. E. Anderson, president of the California Transportation Company, San Francisco; Alden Anderson, president of Capital National Bank, Sacramento; C. A. Atherton, general manager of the California Delta Farms, Inc., Stockton; P. M. Downing, vice president and general manager of the Pacific Gas & Electric Company, San Francisco; William Durbrow, president of the California Irrigation District Association, Grass Valley; Manley S. Harris, president. Mild Life Development League, San Francisco; W. L. Hechman, vice president of the W. A. Curtis Estate Company, Antioch; Warren H. McBryde, consulting industrial engineer, San Francisco; R. V. Meikle, chief engineer for the Turlock Irrigation District, Turlocq; Jesse Poundstone, president of reclamation District 108, of the Stanford Vina Ranch Irrigation Company, Vina, and Herbert E. White, Sacramento.

To Our Little Pal
JIMMY O'CONNOR

'Twas a beautiful balmy evening
In the merry month of May;
But it was changed to one of sorrow
When our Jimmy passed away.

Oh! How we miss you, little Jimmy,
Little Pal of ours so true;
How we miss your smile of welcome
And your twinnling eyes of blue.

Now, all the sunshine has departed
For you took it all with you;
Oh! Little Pal, we're broken hearted
And we're lonesome, sad and b.lue.

But they say that God it Just
And though he calls the ones we love,
Oh! Little Pal, we know you must
Be with the Angels, up above.

How we wish that you were with us
And though our wishes prove in vain,
We know that up in Heaven
We will some day, meet again.

(Name on Request)

TO MAKE A STUDY OF SARDINE LIFE ALONG COAST

Study of the life habits of the sardine and other marine life along the coast of California as far north as Eureka is now being made by members of the Division of Fish and Game, according to an announcement from the Bureau of Commercial Fisheries yesterday.

The scientific workers he added, by E. C. Csofield, recently arrived in San Francisco harbor aboard the Division's oceon going survey ship "Bluefin." Weather permitting, they will cntinue a zigzag course to sea in pursuance of their studies.

It is the first visit of the "Bluefin" to San Franmcisco harber since the boat was commissioned last year in San Diego, according to Captain Walter B. Engelke. The boat is 86 feet in length and is designed for long trips far out to sea.

The boat recently completed a trip 300 miles south of San Diego where it is believed that the southern limit of sardine spawning bed was discovered. Discovery of rock cod of Thetis Bank, 300 miles farther south than they ever had been taken before, was also made. The boat covered about 2400 miles on this trip.

Acording to present plans, the "Bluefin" will go too sea at least 150 miles along this northern section of the coast in search of scientific facts. The length of the stay in this section has not been announced.
